2021 AN EXCITING YEAR FOR PROJECT MEND!

Project MEND celebrated the grand opening of our state-of-the-art Headquarters & Fulfillment Center! This facility has been tailor-made to Project MEND's needs and procedures for refurbishing donated medical equipment. The warehouse area is divided into two sections; To Be Cleaned and Cleaned, with a cleaning and repair area in the middle, mezzanine space for storage, and fans to regulate temperature. Our administrative staff is also housed in the same building, providing ease of communication and faster turn-around service for our clients. We have three conference rooms to facilitate the intake process for our clients and caseworkers, meetings, gatherings, & events. Come visit us for a tour today!

OTHER 2021 MILESTONES

We have been able to thrive through the pandemic by continuing to pivot our services to curbside and delivery to better accommodate our clients' needs.

We have expanded our repair services.

We received a Xenex Robot to provide an additional level of disinfection of our Durable Medical Equipment.

Our staff and board expanded to better meet the needs of those we serve, and we received an incredible \$250,00 donation from Kym's Angels.

Thank You for *Keeping Our Wheels in Motion*

Scotty is a vibrant, bubbly, 6-year-old who was born with Phocomelia, a rare defect causing severe extremity malformation. His mother reached out to Project MEND desperately needing a power chair. The chair he was using was too big for his classroom and did not match his functionality.

She had reached out to other organizations near her in Dallas, but was not able to find the help they needed to better manage her son's diagnosis.

Project MEND was able to match Scotty with the perfect chair making the 5-hour journey well worth it. Through financial and equipment donations,

Project MEND was able to make a world of difference for Scotty, his mother, and more than 1,500 other lives in 2021.
